Transportation Security Administration Purchases 100 L3Harris Technologies Passenger Screening Systems

Highlights:
- Additional ProVision 2 systems will be deployed at airports nationwide
- 215 ProVision 2 units already deployed at U.S. airports
- Product development roadmap provides long-term confidence in system

TEWKSBURY, Mass., February 25, 2020 — The Transportation Security Administration (TSA) has purchased 100 additional L3Harris Technologies (NYSE:LHX) ProVision® 2 passenger screening systems that will be deployed at airports throughout the United States.

The ProVision 2 system is a scanner that uses software to screen passengers at the checkpoint. The ProVision family was first introduced in 2009. Nearly 1,000 ProVision systems (both ProVision and ProVision 2) have already been deployed nationwide.

“The ProVision has been a stalwart within the security industry, and continuous developments ensure that it will remain at the forefront of the industry for years to come,” said Todd Silvestri, Vice President, Product & Program Development for Security & Detection Systems, L3Harris. “We work to enable our products and technology roadmap to align to TSA’s security mission.”

About L3Harris Technologies
L3Harris Technologies is an agile global aerospace and defense technology innovator, delivering end-to-end solutions that meet customers’ mission-critical needs. The company provides advanced defense and commercial technologies across air, land, sea, space and cyber domains. L3Harris has approximately $18 billion in annual revenue and 50,000 employees, with customers in 130 countries. L3Harris.com.
